Subject: Usage of Remote Training
Ref: ANSFISA note n. 0013066.01-04-2022

Dear ANSFISA colleagues,

ERA has received a complaint via its ERA website "contact us".

According to this complaint, with the letter mentioned above, ANSFISA seems to have removed the possibility of remote training and examination for those staff dealing with operational safety critical tasks.

Please consider that the Agency's view is that EU railway legislation requires that training methods are managed in the Safety Management System of the Railway Undertakings and Infrastructure Managers.

We then kindly ask you to clarify your position on that and make this clarification available to any involved stakeholders.

Yours faithfully,

Josef DOPPELBAUER
Executive Director
